

ALIME 7

ADHESIVE GREASE-CODEX
FOR THE FOOD INDUSTRY

Nonfood Compounds
Program Listed: H1
Registration Number: 160715

7 good reasons for using ALIME 7

1. Authorized in the case of incidental **food** contact NSF H1.
2. Has high **adhesion** and excellent holding in the cuttings and in the shocks.
3. **Non-drip** grease.
4. Good **resistance** to water, moisture, acids and weak alkaline compounds.
5. Compatible with most elastomers and plastics.
6. Resists centrifugal force up to 1500 Trs / axial.
7. Used at continuous low and high temperature - **20°C to + 180 °C**.

Particularly suitable for use in

F.P.I.

Industry

Construction

For the lubrication of any equipment such as: bearings, joints, power transmissions, chains with rollers, gearings, cogwheels transmissions, never ending screw, sticks, buttons, pumps, gates, slide channels. Any general lubrication in the assembly or in maintenance of percolators, water heaters, counters, measuring materials, marine equipment, packaging machines, capping machines, press tools, assembly of joints.

Characteristics	Instructions for use
Composition: foodstuff greases and oils, polymers, inhibitor agents, inorganic gelling agent. Active principle Appearance fluid. Colour translucent. Density 0.8 Propellant gas CO ₂ Volume 400 ml. For more information, see MSDS.	Eliminate any tracks of old grease, apply to a dry surface. Shake before use. Spray uniformly on the surface to be lubricated.

RE: ALIME 7
Category Code:H1
NSF Registration No. 160715

NSF has processed the application for Registration of **ALIME 7** to the *NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds* (2017), which are available upon request by contacting NonFood@nsf.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

NSF Registration of this product is current when the NSF Registration Mark and Category Code appear on the NSF-approved product label, and the Registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (www.nsfwhitebook.org).

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at www.nsfwhitebook.org. Please note the letter date reflects most recent product review. NSF utilizes annual verification to ensure no changes have been made to a registered product. Changes in formulation or label, without the prior written consent of NSF, will void Registration, and will supersede the on-line listing. Please contact your NSF Account Manager or nonfood@nsf.org if you have any questions or concerns pertaining to this letter.

Sincerely,
