

# BOTEK BG+

MICRO-ORGANISM FOR MAINTENANCE  
OF GREASE TRAYS & PIPES

## 7 goods reasons for using BOTEK BG+

1. With a high-performance bio-active power, it breaks up **degrades and digests** long and short chain fatty acids, proteins, lipids and carbohydrates.
2. High powered **micro-organism strains and enzymes**: optimum performance for grease removal.
3. Absolutely **neutral for equipment**.
4. Used regularly offers a **preventive** solution and **reduces** odours.
5. **Without danger** for the user.
6. Very good **stability** over time.
7. **Reduces** the frequency of emptying tanks and improves **flow**.

## Particularly suitable for use in

Public buildings

Food trade

F.P.I.

Biological liquefaction of all organic pollutions due to greases, oils, sugar, cellulose, excrement.  
Eliminates odours.

Designed to eliminate deposits, without blocking pipes, dip tanks, septic tanks or cesspools.

Characteristics	PUMP BG	Instructions for use
Appearance Density at 20°C ±0.5 pH at 20°C Using temperature		<b>1/ Grease trays:</b> The bacteria should be seeded on clean grease tray. The first dose will be 1.5 l/m <sup>3</sup> . Maintenance doses after cleaning: - 0 to 200 meals: 100 ml/day - 200 to 500 meals: 250 ml/day - 500 to 1000 meals: 350 ml/day. - 1000 to 2000 meals: 500 ml/day. Dosage guidelines, It can be modified according to the activity and the size of grease trays. It is recommended to inject the product at least 2 hours after the end of the sitting. BOTEK BG+ should be dispensed preferably using our pump. <b>2/ Standard pipes:</b> - seeding: 200 ml the first week - regular maintenance: 75 ml per week
