

FONT GREEN

DEGREASING FOUNTAIN
BIOLOGICAL

Is used with the degreasing product **GREEN CLEAN** :
pH neutral,
No safety labelling,
Heated at 38°C

Regeneration of the product with microorganism pellets : **GREEN TABS**

By brush, spigot or soaking
User an environment protection
Mobility with 4 integrated wheels

TECHNICAL CHARACTERISTICS

Dimension parts washer (mm)	Height 1080, Lenght 905, width 650
Dimension cleaning table (mm)	Height 200, Lenght 790, width 420 (mm)
Empty weight	46 kg
Tank volume	100 litres
Soaking capacity	30 litres
Soaking height	90 mm
Pump flow	1140 litres/h
Heating power	1 KW
Electrical consumption	200 W/h
Power supply	230 V
Payload	100 kg
Normal temperature	38°C (with boost function : 43°C, +50% of powerful degreasing)
Stainless steel filtration system	700 µ (stainless, steel basket filtre) + 140µ (internal stainless filtre)
Cover	Limitates evaporations
Empty height	390 mm
Mobility	2 fixed wheels + 2 steering wheels with brake

Does not use solvent (solvent used can destroy the fountain and it won't be cover under warranty).

7d'Armor

The **biological parts washer** uses natural regeneration to ensure the efficient and economical degreasing of parts.

The **biodegradation**, natural process, uses microorganisms to transform pollutants into a source of food and energy. It also reduces sludge and unpleasant smells.

Processing

FONT GREEN: part washer which is heated and regulated at 38°C and which optimises the cleaning and biodegradation process GREEN TABS. It is equipped with several cleaning possibilities (brush, spigot, soaking) and filtration.

GREEN CLEAN: Aqueous and pH neutral solution with special surfactants, non-toxic and non-flammable. Solvent free, without safety labelling.

GREEN TABS: concentrated microorganism pellets (group 1) continuously purify the cleaning bath and break down oil and fat.

Advantages

User's health

You are working in optimal hygiene and safety conditions.

Solvent free
Non toxic, safe
Not flammable
Water-based : pH neutral

Efficiency

You get a higher finishing quality.

Constant cleaning quality with the bioremediation
Efficient cleaning of any type of dirt
No greasy residue on parts
Part protection from corrosion

Economical

You control your consumption of consumables

Microorganisms regenerate the liquid continuously
Cover to limit evaporation
Washable and reusable stainless steel filters
Lengthens operational life of cleaning product

Environment

You contribute to the protection of environment.

No V.O.C. emission
Reduces waste
Natural biodegrading process by group 1 microorganisms
