

FORCE 601

PELLET FOR DISHWASHER ALL IN 1 ,
WASHING, RINSING, REGENERATING SALT, DESCALING, PROTECTING

WATER-SOLUBLE FILM
PHOSPHATE FREE

7 good reasons for using FORCE 601

1. **Polyvalent:** 1 only pellet for 6 uses: washing, rinsing, regenerating salt, descaling, glassware protective agents and machine protective agents.
2. **Washing-rinsing:** Enzyme formula to eliminate dirt and organic stains easily (coffee, tea, tannin, starch...). Active from 50°C.
3. **Salt use:** softens the washing water, prevents the calcareous deposits on your dishwasher (cloudy glasses). As useful in **hard water** as in **fresh water**.
4. **Protection of glass:** guaranteed anti-corrosion effect on glass. Avoid the appearance of an irreversible whitish layer on the glass.
5. **Machine protection:** ensures the protection and maintenance of your dishwasher.
6. **Descaler:** unsticks the stubborn stains on dishes.
7. **Economical:** pellet packaged individually (water-soluble film): one pellet per dishwasher cycle.

Particularly suitable for use in

Services

Catering/Food retail

Public buildings

For all types of dishwashers, ideal in the hotel trade (Hotels, restaurants, school canteens...), food product industries (slaughterhouses, dairies, caterers, canning factories, delicatessens, etc...)

Characteristics	Dosage and Instructions for use
<p>Regulation CE n° 648/2004 - 907/2009 : contains from 15 or more but less than 30 %: oxygenated bleaching agents; less than 5 %: polycarboxylates, non-ionic surfactants; also contains: enzymes (amylase, protease), fragrance</p> <p><u>Physico-chemical characteristics:</u> Rectangular pellets 3 layers: yellow white green Fragrance: lemon Wash between 50 and 70°C.</p> <p><u>Legislation and safety:</u> Complies with the decree of 19th December 2013 modifying the decree of 8th September 8th 1999, modifications which concerned processes and cleaning products for materials and objects in contact with foodstuffs, products and drinks for the human and animal food.</p> <p>The supplier is only responsible for the uses, instructions and dosage mentioned on this data sheet.</p> <p>Packaging: bucket with 150 pellets of 20g each in water-soluble film = 3 kg.</p>	<p>Remove leftovers from the dishes, check the cleanliness of the filter. Take the pellet out of the packaging and place it in the cutlery basket or in the wash compartment of the door. Start the dishwasher by choosing the appropriate washing program.</p> <p><u>Using dosage:</u> 1 pellet of 20g per cycle (washing and rinsing). For glass washers, can be used during 4 to 5 cycles. With very hard water, use 2 pellets.</p> <p>PRECAUTIONS FOR USE: Only use in a dishwasher, cannot be used for washing dishes manually. Wash hands in the case of direct contact with the skin. Choose a low-temperature wash cycle, run the dishwasher with a full load and do not exceed the recommended dose of cleaner. It will limit the consumption of energy and water and will reduce the water pollution; avoid letting the organic stains dry before washing. Verify regularly the cleanliness of the filter. Avoid washing the fragile dishes in the machine (silverware, porcelain dishes, dishes with fragile decoration, crystal glass). Store pellets in an environment at room temperature (20-22°C) and the lowest possible humidity rate (< 40%). Close the bucket well after use. For more information, see MSDS.</p>
