

GLASSPOL

CONCENTRATED LIQUID, SPECIAL WINDOWS

7 good reasons for using GLASSPOL

1. The solvent agents **instantaneously** break down oils and greases on windows.
2. The surfactant agents make the application of GLASSPOL **easier** and the squeegee moves smoothly over the glass without leaving marks.
3. The ammonia activating agents disaggregate **solid** particles, notably organic particles (insects).
4. **High** evaporation rate so quick wipe dry.
5. Guaranteed **without** abrasive agents or silicone.
6. **Neutral** and does **not** corrode any surfaces (anodized aluminium, paint, plastic, rubber...).
7. **Anti-static** and **anti-condensation**.

Particularly suitable for use in:

Services

Construction

Transport

Public buildings

For cleaning all hard and polished surfaces: glass, plexiglas, stainless steel, varnish, chromium, glaze....

Characteristics	SQUEEGEE	Instructions for use
Composition: hydro-alcoholic solution of surfactant and wetting agents. For more information, see MSDS.		Use GLASSPOL diluted with water in the proportion of 1 volume of GLASSPOL for 5 to 10 volumes of water. The solution is applied by spray or by sponge. Then wipe off with a rag or a squeegee.
