

HYPAC

**WATER-REPELLENT &
ANTICORROSION NON-STICK FLUID**

7 good reasons for using HYPAC

1. **Repels and eliminates** water and humidity from surfaces. "water-repellent" quality.
2. Forms a thin isolating **watertight** and protective **film**.
3. Powerful **anticorrosion** capacity.
4. Penetrates and infiltrates into **the smallest pores** and fissures.
5. Can be used **without danger** on all electrical equipment (including high-voltage)*. Breakdown voltage complies with CEI standard 156: 60.000 V.
6. **Does not corrode** paints, plastics or rubbers.
7. **Protects** motors, electrical cables and equipment during asbestos removal.

Particularly suitable for use in:

Public buildings

Transport

Industry

Reconditioning of all electronic and electrical equipment (engines, circuits, spark-plugs, batteries...).
 Protection of marine engines, public works vehicles, agricultural materials and other vehicles...
 Protection of sheet metals, assembled parts or spare parts, tools, nuts and bolts, screws, machine tools, conveyor belts, etc....
 Protection of mobile parts, locks, weapons, mechanical assemblies, hinges...
 Non-stick protection of concrete and cement on painted metallic surfaces; use on mixer trucks, concrete mixer plants, mixers ...

Characteristics	Instructions for use
Flash point >100°C Average density: 0.81 Film thickness: 3 to 6 microns. Net volume: 400 ml Non-flammable propellant gas: CO ₂ Available in bulk. For more information, see MSDS.	Apply the product with a brush or in dip-tank, or by spraying (around 20cm from parts to be treated). The aerosol can be used in all positions. Its extension cable facilitates treatment in hard-to-reach areas. The protective film HYPAC can be removed from equipment with DILUPAINT. *PRECAUTION: all spraying of HYPAC must be done on devices which are switched off.
