

# O FRESH MOUSSE

**SUPER-ACTIVE FOAM FOR THE BIOTREATMENT OF TRAPS & SANITARY INSTALLATIONS**

## 7 good reasons for using O FRESH MOUSSE

1. O FRESH MOUSSE is an ultra-compact **expanding** foam that allows for quicker and easier degradation of organic and uric deposits.
2. The product's effect is strengthened on **vertical surfaces** due to its exceptional hold over time. Doesn't run.
3. **Optimum** action on the first 20-30 centimetres of drains - the main source of bad smells.
4. Economical: 1 aerosol can treat up to **200** traps.
5. **Preventive** action: leaves a protective biofilm which prevents renewed deposits of lime and uric scale over time.
6. Its unique **fragrance** sanitises, refreshes and becomes the indicator of the sanitary installation's cleanliness.
7. The **extension hose** helps to treat difficult areas.

## Particularly adapted for use in

Public building

Hotel & catering

Construction

7 in 1 product for an efficient and complete treatment of all sanitary installations (toilets, urinals, showers, taps, wall tiling, walls, floors...) no matter what the surface (tiles, enamel, ceramic, chrome, stainless steel, glass...). Leaves enamel and taps shining.
